Key Features and Benefits

SmartVision 60: All-in-One Audio and Video integration machine

A new generation of smart conference room audio and video equipment jointly created by Yealink and Microsoft: SmartVision 60 All-in-One audio and video integration machine. This all-in-one machine has a pioneering 10K 360° wide field of view + 360° pickup range, supports intelligent multi-speaker tracking, Cortana voice assistant, voice transcription, identity recognition and other cutting-edge AI functions of Teams, will bring you All-round immersive smart meeting room experience. The design language of the new concept and the ingenious structure of the privacy cover design take into account the beauty and practicality while paying attention to the protection of user privacy.

Simple to deploy, Easy to use

With the VCH port and USB port, Yealink audio and video system is specially designed for video meeting rooms so that the deployment can be easily extended. At the same time, with the cable management feature of Yealink MCore Pro, ensures the wire connection's stability and the most appropriate deployment can be achieved according to the layout of the meeting room. One CAT5e is enough to connect the TV area and the conference table area, and to complete the data transmission and power supply, no additional power supply or extension cable is needed, which not only simplifies the deployment but also effectively reduces deployment costs.

Manage your devices remotely

This solution supports Yealink Device Management Platform/Cloud Service, and you can flawlessly manage, monitor, configure, update and diagnose all Yealink audio and video device peripherals on this platform remotely.
